

CRISTIAN RODRIGO ESTRADA ROMERO

Software Engineer | Frontend & Application Architecture

Santa Clara, CA | (408) 839-4713 | ecristian963@gmail.com | linkedin.com/in/cristian-estrada-romero | cristianestrada.co

PROFILE

Software engineer with 6+ years of experience building production web and mobile applications and improving complex systems. Specializes in React, TypeScript, Vue.js, client-side architecture, performance and reusable application patterns. Has led technical teams and cross-functional delivery, including responsibility for institutional systems serving 35,000+ users.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Vue.js, Single-SPA microfrontends, React Native, Flutter, component design, REST APIs

Engineering: Application architecture, performance optimization, debugging, production incident response, test automation, technical documentation, Agile/Kanban

Additional: Python, Node.js, Express, SQL, PostgreSQL, Oracle 19c, Linux, Nginx, Git, LLM API integration

PROFESSIONAL EXPERIENCE

Testing Engineer — Hyve Solutions | Mar 2026 – Jul 2026

- Developed a React/Python application consolidating server-testing activities and operator workflows within a single interface.
- Implemented automated testing utilities and script discovery with dynamically generated inputs and descriptions; enabled more concurrent server operations while reducing operator-workstation resource usage by approximately 80%.

Full-Stack Engineering Contributor — withcortex.ai | Oct 2025 – Jan 2026

- Built React and TypeScript features for an AI-powered document analysis product, contributing to client architecture, navigation, document editor workflows and LLM-enabled services.
- Optimized PDF viewer rendering from 0.5–1.0 seconds per page to approximately 0.01–0.1 seconds per page, improving responsiveness of document interactions.
- Implemented document-processing integrations with Python services and helped evolve maintainable interactive frontend workflows.

Software Architect & Infrastructure Engineer — Universidad Libre | Mar 2024 – Apr 2025

- Led architecture and operational support for enterprise infrastructure serving more than 35,000 students and staff across multiple campuses; managed critical Oracle 19c and Linux environments.
- Reduced a critical data-export workflow from four hours to 30 minutes through query optimization and automation; built Python/R tools for reporting and maintenance.
- Coordinated production incident recovery, vendor collaboration, on-site technical personnel and deployments; supported user enablement and technical knowledge sharing.

Founder & Technical Lead — Sharkstart | Jan 2024 – Jul 2025

- Founded and led a small development team delivering client-facing web and mobile applications, guiding technical architecture, implementation, deployment and Agile planning.
- Delivered EventosJV with streaming data for live statistics and voting, ASEPAD certificate workflows and Dutsicakes headless commerce solutions.

CRISTIAN RODRIGO ESTRADA ROMERO

Software Engineer | Frontend & Application Architecture

PROFESSIONAL EXPERIENCE – CONTINUED

Frontend Developer – SBS Colombia | Jul 2023 – Jan 2024

- Developed broker-facing insurance quotation experiences using Vue.js and a Single-SPA microfrontend architecture.
- Improved frontend maintainability, component organization and API integrations; collaborated with backend and QA teams on sprint delivery and production troubleshooting.

Technical Consultant – Matrica / Q-Vision | Mar 2023 – Jul 2023

- Investigated and fixed recurring production issues in a React Native application, spanning client code and PostgreSQL-backed services.
- Supported a TypeScript migration, debugging, stabilization and documentation of technical debt and refactoring recommendations.

Frontend Developer – Puvodessentials | Sep 2022 – Feb 2023

- Contributed to e-commerce modernization, migration away from legacy frontend implementations, and performance improvements.
- Supported site integrations, database/content migration and product-facing user experiences in an international work setting.

Lead Developer – Conectados (Academic Project) | Jun 2021 – Jul 2022

- Led a small development team in designing and delivering an accessible Flutter mobile application for older adults.
- Defined application architecture and accessible interaction patterns, coordinated with stakeholders and supported mobile deployment.

Freelance Developer | 2019 – 2020

- Delivered web applications and Java desktop software for business workflows, including sales and data management.

Trainee Developer – Parquesoft Meta | Mar 2018 – Aug 2018

- Built database-backed applications and stored procedures using SQL, C# and .NET tooling.

SELECTED PROJECTS

EventosJV: Real-time data streaming for event statistics, attendance and voting. ASEPAD: Digital certificate and verification workflows. Dutsicakes: Headless e-commerce frontend and integrations.

EDUCATION & ADDITIONAL TRAINING

B.S., Systems Engineering – Universidad Cooperativa de Colombia (2024). Mobile Development Certificate (2022).

Languages: Spanish (native), English (professional).
